App Configuration	. 7

FEATURES

- 1. This App allows extracts of GL transactional data.
- 2. It then flags the data as exported and prevents updates to those transactions.

IMPORTANT NOTES

• We recommend that you test the configuration of the App thoroughly in a test system prior to deploying the App in your live Greentree system.

OTHER REQUIREMENTS

Greentree Modules: General Ledger

Associated Apps:

USER INSTRUCTIONS

GL TRANSACTION EXTRACT

| System | Utilities | System Scripts

This App enables the System Script shown below:

Output to screen is not relevant (and will be ignored). The output file will be generated in the location defined in the App configuration, and a message emailed to the address nominated.

G GL Export	Transaction	าร				X
 Export for Cu Re-export for 	rrent Date) Date		20/7/	2017		
Date	11	O				
Export for Da	te Range					
From	11	O	То	11	0	
				Export	Cancel	

The extract can be to current date, to a different selected date, or for a date range, based on Posting Date. Other than the Re-export option, only transactions that have not already been exported will be included.

The file created has the following fields;

GL Transaction Line OID

Company Code

Document date

Posting date

Job Code – if the line was generated from a job cost transaction

Job Name - if the line was generated from a job cost transaction

Work Centre - if the line was generated from a job cost transaction

Activity Code - if the line was generated from a job cost transaction

Credit GL Account - if the transaction is a credit posting

Debit GL Account – if the transaction is a debit posting

Amount – in account currency

Narration

Detail – field on journal

OID is the unique identifying number for that particular record within the database – you won't ever see this via a screen.
